No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                               Score

//occs_Togon: Lung; Vector: P7773-Pac (Pharmacia) with a //occs_Togon: Lung; Vector: P7773-Pac (Pharmacia) with a modified polylinker; Site 1: Book I; Site 2: Not II; UI-CF-DUI is a normalized cDNA library containing the following tissue(e): Primary Lung Epithalial Cells The library was constructed according to Bonado, Lemon and Soares, Genome Research, 6:791-806, 1956; Pires Errand CDNA synchesis was priced with an oligo-d (DNA mass 1) get of the containing a Nobros. 6:591-806, 1956; Pires Errand CDNA synchesis was priced with Not I. and cloned containing a Nobros. 6:591-806 with Not I. and cloned describanily into p7773-Pac vector. The oligonucleotide used to prime the synthesis of first-strand CDNA contains a library tag sequence that is located between the Not I library is GCCTOTAGC.

modified polylinker; Site 1, Rope I; Site 2, Not II.

UT-Sado is subtracted CONN library constructed according to Bonaldo, Lennom and Soarce, Genome Research, 6:791-806, 1966, First extrand CONN synthesis was primed with an oligo-dr primer containing a Not I site. Double stranded Only and choned directionally sino pyTT1-Re sis effect; the containing a Not I state or Double stranded only more than 1 the program of the site is freezer; the oligo containing a library peas generally that is forced thereon the Not I site and the double when the sequence tags for this library are: fetal eyes, AGANCHOMA, lens, CGATMAGCOM; eye anterior segment, AATGCOGNI; optic nerve, CCGTMAGCI; retina, CGCGO, Retina Foweal and Macular, GTCC, RFB and Chocold, ACCTA. This library was faced for the program, Gene blaceovery in the Visual System, supported by National By Institute (NEI).*

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

TITLE OF INVENTION: Process for identifying Anti-Cancer Therapeutic Agents Using Canc

TITLE OF INVENTION: Gene Sets

TITLE REFERENCE: 689200-77

CURRENT PILING DATE: 2002-05-02

PRIOR PRILIAGION MUNBER: US/09/954,531

CURRENT FILING DATE: 2002-05-02

             Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
